ABOUT US

COMPANY OVERVIEW

Novity is a startup games company based in Manchester, UK, dedicated to making Virtual Reality games and experiences with meaningful and lasting impact.

We are a bold and enthusiastic team, striving to be at the forefront of Virtual Reality. We work with the latest technology to bring our visions to life and provide full immersion and enjoyment for everyone.

OUR FIRST PROJECT

For our first endeavour, we decided that we wanted to go adventurously where no VR game had gone before - into the world of medieval cooking! Our first game, Rags to Dishes, is a single-player VR cooking game set in a medieval kingdom.

You'll play as the chef, striving to cook up a storm and reach the dizzying heights of catering to the royal family themselves! Starting with the peasants, you'll need to please both the masses and the monarchs to keep your kitchen running until the final level where you'll have the chance to prove yourself to the King and Queen!

RAGS TO DISHES

ABOUT THE GAME

Our first project is Rags to Dishes, a single-player Virtual Reality cooking game with simple but effective mechanics and an engaging campaign.

With skewers, soup, and even seasoning, this is one of the most rewarding cooking games you can try, thanks to the huge variety of the menu on offer.

As you progress through the game, the meals get trickier and your prices will rise – but of course, more money equals more upgrades!

GAME MODES

Campaign Mode: In the main Campaign you'll move from phase to phase with the goal of becoming the chef for the Royal Court.

5 Minute Mode: Like the name suggests, the 5 Minute Mode is a game mode designed for quick play and great for social gatherings and showcasing the game.

FACT SHEET

QUICK FACTS

Developer: Novity, UK

Genre: Action, Casual, Indie, Simulation

Available On: HTC Vive, Oculus Rift, Valve Index

FUTURE PLANS

We have lots of exciting ideas lined up for our future creations but we can't give away too much just yet.

However, we can let you into a little secret... we have plans to create multisensory Virtual Reality experiences, the likes of which haven't been seen before!

Stay tuned to find out more!
